About Me

I am a full-stack developer, capable of working on mobile applications (iOS and Android), web applications, and desktop applications. I stay constantly informed about technological advancements, both in hardware and software. I like to specialize in the tools I use daily and seek ways to integrate new tools that facilitate development. I also experiment with new development technologies and, when applicable, take the opportunity to implement them in my work.

Objective

To grow professionally in software development by taking on new challenges, applying the knowledge gained from my studies and work experience, and working in a positive environment with colleagues who share my passion and dedication for this profession.
